

TORNADOPOWER Cloths trial packets— same big benefits, new small package

Central vacuum dealers across the country now have the opportunity to discover for themselves, risk-free, the many benefits of TORNADOPOWER Central Vacuum Maintenance Cloths.

TORNADOPOWER Central Vacuum Maintenance Cloths by Wincor Inc. are the simple and effective way for central vac owners to clean, maintain, deodorize and test their entire vac system. The cloths are specially formulated and textured to capture dirt and grime residue that exist in the hose and tubing of the central vacuum system. Also, when pulled through the system, these cloths capture larger debris (such as pebbles and lint) and deliver them to the canister, eliminating potentially harmful blockages. Finally, the moistened cloths “wipe down” the inside walls of hoses and tubing, leaving the entire system smelling fresh and clean.

Now, in addition to the standard 25-sheet container, TORNADOPOWER Central Vacuum Maintenance Cloths are available in new six-sheet trial packs. Each trial pack contains enough sheets to clean a three-inlet central vacuum system twice. According to Lisa Corwin, president of Wincor Inc., these trial packs are the perfect way for dealers – and their customers – to get started with TORNADOPOWER.

“These trial packs are the perfect way to discover what TORNADOPOWER is all about,” said Corwin. “Dealers can use a trial pack to discover the product’s many benefits and decide if they want to become a dealer. From there, they can use these packs to introduce TORNADOPOWER to their valued customers, or include them as part of their standard service/maintenance protocols.”

For limited time, interested central vacuum dealers can request a trial pack for evaluation purposes at no cost and under no obligation. Interested dealers are directed to go to www.wincorinc.com, click on the “Free Trial Pack” button on the left hand side, and enter the password “free” when prompted.
